

1. Login - verified 15 September 2026

1. Open <https://gwendolynops.github.io/GwenconnectParticipants/>
2. Enter your own assigned Email and PIN.
3. On a shared device, leave Remember this device unchecked unless management approves otherwise.
4. Select Login. Confirm your own identity and assigned role after successful login.

Public login and authenticated Admin controls were inspected read-only. Screenshots show blank forms with no participant selected. Staff/HM permissions and saved results still require supervised confirmation.

Sources: S9, G4. Full references at the end of this document.

2. House, participant and plans

Admin controls verified read-only; Staff/HM access and save behaviour require confirmation

Participant selection and house checks

Participants opens Active Participants with Name, House and Profile actions.

Profile provides Add Shift Note, Add Incident, Medication / MAR and Documents.

Each main entry form also has its own Participant selector. Recheck it each time.

Confirm the correct house against the participant profile.

A House filter was observed in Restrictive - Daily Records Search. No global staff house filter was verified.

Staff/HM visibility and permissions need role-specific demonstration.

Profiles and current documents

Participants - Profile shows participant context and task shortcuts.

Documents - View Participant Documents has Participant and Load Documents.

Locate current plans and clarify missing or conflicting versions with management.

An app profile does not authorise a clinical or restrictive-practice task.

Use your participant-specific briefing and current approved instructions.

Document version controls and staff access still need management verification.

Manager: role-specific demonstration, successful-save check and date

3. Shift notes

Admin controls verified read-only; Staff/HM access and save behaviour require confirmation

Shift Notes: entry and saving

Choose Shift Notes, then Participant and Shift Date.

Select Shift Type and Entry Type: Live or Late Entry.

Complete Shift Note under the nine prefilled Gwendolyn headings.

Check participant, actual event times, support, choice, outcomes and follow-up.

Select Save Shift Note when the entry is ready.

Confirm the saved result through Records search. Save behaviour and permissions require supervised validation.

Manager: role-specific demonstration, successful-save check and date

Support Provided:

Meals / Fluids:

Personal Care:

Medication:

Behaviours / Concerns:

Community Access:

Sleep / Settling:

Handover:

Follow Up Required:

Use the matching workflow on the preceding page. Read labels, check each default against the actual event and scroll for remaining fields. No record was saved or changed during inspection.

Manager demonstrates the permitted Staff/HM view and what a successfully saved record looks like. For safety-sensitive records, verify the current participant plan and separate task authority before entry.

4. MAR and PRN

Admin controls verified read-only; Staff/HM access and save behaviour require confirmation

Medication: Daily MAR and PRN

Medication - Daily Webster Pack MAR: Participant, Date, Load Daily MAR.

Administer PRN Medication: Participant, Date, Time, Load PRN Medications.

Select the correct person and actual date/time before loading.

Only record verified actual administration within separate medication competency.

Never pre-tick, bulk-sign unknown doses or use another account.

PRN dose, reason, effect and signing controls after loading were not tested. Follow the authorised plan and manager demonstration.

Medication handover and exceptions

Shift Medication Handover Sign-Off records date, shift and participant.

Check MAR checked?, unsigned packs/concerns and PRN administered today?.

Record medication issues and handover notes before Sign Medication Handover.

Check defaults against actual facts. A default Yes is not evidence of a completed check.

Manage Participant MAR Profile and Add Medication were visible to Admin. They are not general staff authority.

Escalate contradictory directions or uncertain doses. Do not alter history to fix a display issue.

Manager: role-specific demonstration, successful-save check and date

4. MAR and PRN - screen guide

Manage Participant MAP Profile

Use the matching workflow on the preceding page. Read labels, check each default against the actual event and scroll for remaining fields. No record was saved or changed during inspection.

Manager demonstrates the permitted Staff/HM view and what a successfully saved record looks like. For safety-sensitive records, verify the current participant plan and separate task authority before entry.

5. Incidents

Admin controls verified read-only; Staff/HM access and save behaviour require confirmation

Incidents: complete the factual report

Incidents - choose Participant, Date, Time and Incident Type.

Reportable Incident? includes Unknown / To be reviewed. Escalate uncertainty to management.

Complete facts, immediate action, treatment/advice, witnesses, notifications and follow-up.

Call 000 for emergencies and notify management immediately for possible reportable incidents.

No dedicated awareness-time field was observed. Include first awareness date/time/source clearly in the narrative and notifications.

Review all defaults, then Save Incident Report. Saving does not prove urgent notification was received.

Manager: role-specific demonstration, successful-save check and date

Environmental Factors

Use the matching workflow on the preceding page. Read labels, check each default against the actual event and scroll for remaining fields. No record was saved or changed during inspection.

Manager demonstrates the permitted Staff/HM view and what a successfully saved record looks like. For safety-sensitive records, verify the current participant plan and separate task authority before entry.

6. Restrictive monitoring

Admin controls verified read-only; Staff/HM access and save behaviour require confirmation

Restrictive: daily monitoring

Choose participant, Monitoring Classification, shift/period, date and actual time.

Distinguish routine environmental monitoring from actual regulated RP use.

For use, record type/category, duration, BSP version, authorisation, actions, impact and notifications.

Check access/outcome, incident and PRN defaults against what occurred.

Complete Linked Incident Report ID and follow-up where relevant, then Submit Daily Monitoring Record.

The Restrictive Practice Register says Management use only. A dropdown choice never authorises a practice.

Manager: role-specific demonstration, successful-save check and date

Use the matching workflow on the preceding page. Read labels, check each default against the actual event and scroll for remaining fields. No record was saved or changed during inspection.

Manager demonstrates the permitted Staff/HM view and what a successfully saved record looks like. For safety-sensitive records, verify the current participant plan and separate task authority before entry.

9. Corrections, downtime and handover

Admin controls verified read-only; Staff/HM access and save behaviour require confirmation

Corrections and wrong-participant records

Report wrong-participant entries, mistaken uploads and privacy risks immediately.

Identify the affected record and potential care impact.

Retain the original and audit trail.

Ask management to demonstrate authorised amendment or addendum.

Record correction author, actual date/time and reason.

Never silently overwrite, backdate, delete history or resubmit repeatedly to hide an error.

When GwenConnect is unavailable

Urgent care and escalation continue by phone.

Use the approved downtime record and current accessible plans.

Record actual event times, author and actions securely.

Notify management of outage and pending records.

Re-enter through the approved late-entry process, retaining original timestamps and source.

Check for duplicates and reconcile MAR/incident/shift records before closing the outage.

Documents: select Participant and Document Type, enter Document Name, use Choose File and add relevant Notes. Review the actual file and authority before Upload Document. View Participant Documents and Load Documents provide the observed retrieval entry point.

10. Management Feature Confirmation

Complete before approving app competency

- ☐ Account and access: confirm Staff/HM permissions, assigned houses and account recovery. Admin identity display and Logout were observed.
- ☐ Participant/profile: verify identity checks, current plan/version display and participant-specific access.
- ☐ Shift notes: nine headings, Live/Late Entry and Save Shift Note observed. Test saved entry, record reference and role-specific PDF permissions.
- ☐ Medication: confirm source of current directions, MAR status codes, PRN tick meaning, dose/time/reason/effect fields, discontinued rows and correction authority.
- ☐ Incidents: forms and PDF controls observed. Confirm save state, receipt, reference and notification behaviour. Record awareness time in narrative where no dedicated field exists.
- ☐ Restrictive practices: daily classification/use fields and monthly export controls observed. Confirm role authority, output reconciliation and separate incident reporting.
- ☐ Appointments/documents: demonstrate dates, transport, reminders (if any), upload, version control and authorised sharing.
- ☐ Errors/downtime: demonstrate audit trail, wrong-participant response, duplicate check, secure temporary records and later reconciliation.

Manager, app version/release or verification date, and sign-off

Current contacts to provide during induction: supervisor / Incident Manager, alternate / Director, app support and Privacy Officer. Emergency assistance: 000. No PIN belongs in this guide.
